---

Well Name/Field Point Name\*: Provide a specific name for each well. Name should clearly identify well for future sampling events (not to exceed 10 characters). If water is collected after a treatment system provide TRT at beginning of Well Name (ie. TRT-SEwell)

An "x" should be placed in the column to the left of the Well Name/Field Point Name field if the well has previously been sampled. This column will be used for previously sampled wells (within the last 5 years) for data entry or during year 2 of sampling to help the laboratory identify previously sampled wells.

Longitude and Latitude: the GPS can be found by using a cell phone or computer. While using google maps on a computer, type in the address and search.

Once the address is displayed on the map, using your mouse right click the pin drop select What's here? A display box should appear near the bottom of the screen.

In this case your latitude = 38.595022, longitude = -121.275040.

On your cell phone - using google maps drop a pin (by placing finger on map and hold in place where the drinking water well is located). When a dropped pin box comes up at the bottom of the screen, scroll down to pin symbol for latitude and longitude information.

County\*: The county the parcel is located.

APN\*: An Assessor's Parcel Number (APN) is a unique number that is assigned to each tract of land in a county by the Tax Assessor. Please provide the APN of the rice parcel where the drinking water well is located.
